

# Test Document

**For testing reference styles of journals in environmental  
microbiology and microbial ecology**

**Journal:** *Environmental Microbiology*

## **Some sample text**

This is how an article reference looks like [1] and another article from the same year and first author [2]. An article with many authors [3]. An article with exactly 7 authors [4]. Article with only 2 authors [5]. Same authors a year earlier to test the order of appearance in the references [6]. An article cited only by year (Dec. 2012). Citing two references at once [8, 9]. A book chapter [10]. And an entire book [11].
